Planting the Seeds of the Future

Poverty and environmental degradation are intrinsically linked. By healing the environment, we can heal lives as well.

Take Part in our Green Thumb Initiative

Community gardens are an excellent opportunity to provide for the needy in your neighborhood, while also providing a chance to educate young people about how food is grown.

Will talking to plants help them grow?

We've heard some pretty ridiculous urban (and rural) myths when it comes to growing your crops. But just because they sound silly doesn't mean they aren't true. So we decided to try them out ourselves to find out just how...

Arid field becomes radiant garden

An empty barren field on the outskirts of a rural village in the south had been a blight on the poor but otherwise lively town. Fast forward six months, and see what a difference a little irrigation made in the lives of these villagers...
